The COMBINED BBQ PLATE is made from a solid plate and laser-cut grid, making it extremely useful for grilling all types of food, allowing you to combine the benefits of grilling on a solid plate and grilling on a grid.

BBQ PLATE

The BBQ plate is made from 4 mm thick boiler plate. Boiler plate is ideal for grilling as it contains additives that prevent burning and warping, and the material is very smooth. The plate is known for its minimal food adhesion.

Maintenance:

BBQ plates must be coated with cooking oil. Do not leave the plates exposed to rain or excessive humidity. It is recommended to clean the plate shortly after grilling, while it is still warm. Clean the plate with a sponge, paper towels, and cooking oil.
