Ex Tax: ~~690.00€~~ 590.00€

Description

Metal Storage Shelving Unit

Robust metal shelving unit designed for practical and organised storage of materials, tools, equipment and other items. Suitable for use in workshops, warehouses, garages and other areas where a large storage surface is required.

The shelving unit is made from a welded steel structure using 30 × 30 × 2 mm square profiles. The construction features six supporting legs as well as additional cross and centre reinforcements for improved stability.

The shelves are made from 15 mm T-FIX plywood, providing a durable and smooth storage surface.

Due to the characteristics of the material and the manufacturing process, minor surface or cosmetic imperfections may occur on the T-FIX boards, such as small scratches or scuff marks. Such imperfections that do not affect the functionality or normal use of the shelving unit are considered acceptable.

The shelving unit has four spacious shelves. In addition to the standard version, custom-made shelving units in other dimensions are also

available upon request.

Features

- robust welded steel construction
- 30 × 30 × 2 mm profiles
- 6 supporting legs
- additional cross and centre reinforcements
- 4 spacious shelves
- shelves made from 15 mm T-FIX plywood
- suitable for storing materials, tools and equipment
- custom-made versions available

Technical data

- Dimensions (W × D × H): 2500 × 687 × 1800 mm
- Number of shelves: 4
- Construction material: square steel profile
- Profile dimensions: 30 × 30 × 2 mm
- Number of supporting legs: 6
- Shelf material: T-FIX plywood
- Shelf thickness: 15 mm
- Construction: welded
- Custom dimensions available: yes, upon request

The load capacity of the shelving unit and individual shelves is not declared. If a specific or documented load capacity or other special documentation for storage equipment is required for the intended use, the buyer must verify before ordering whether the product is suitable for such use.

The stated prices do not include VAT.

Safety and installation
Place the shelving unit on a level, solid and stable surface. Distribute the load evenly across the shelves and store heavier items on the lower shelves. Climbing on the shelving unit is prohibited.

If there is a risk of the shelving unit moving or tipping over due to its location, method of use or possible impact, the user must ensure that the shelving unit is suitably secured to the floor, wall or another

appropriate supporting structure.
