

Height adjustable table 450kg

Product Code: 40624

Availability: In Stock

Price: 671.00€

Ex Tax: 550.00€

Description

A height adjustable table is an essential piece of furniture for those looking to combine comfort, ergonomics, and practicality in their workspace. The ability to adjust the height ensures a smooth transition between sitting and standing, reducing strain on the spine and improving well-being during prolonged tasks.

Electric height adjustable tables provide enhanced flexibility and comfort. A simple button press allows you to quickly and quietly adjust the table's height according to your needs. The stable base ensures durability and safe use, even with heavier loads, making it ideal for offices, home workspaces, or workshops requiring versatile and reliable work surfaces.

Electric work adjustable tables are perfect for demanding users. Their robust construction, high load capacity of up to 450 kg, and advanced functions make them suitable for industrial, laboratory, or workshop settings. A stable design ensures safety at any height and supports heavier loads efficiently.

Whether you're seeking a solution for healthier office work or a flexible surface for technical tasks, height adjustable tables are the ideal choice. Electric versions with capacities up to 450 kg and stable bases offer modern, functional, and reliable workspaces tailored to your needs.
